Ruler: inches and centimeters

Print at 100% (Actual size), then check the scale with the card outline below before you measure.

Scale check

A bank card or ID card should cover this outline exactly

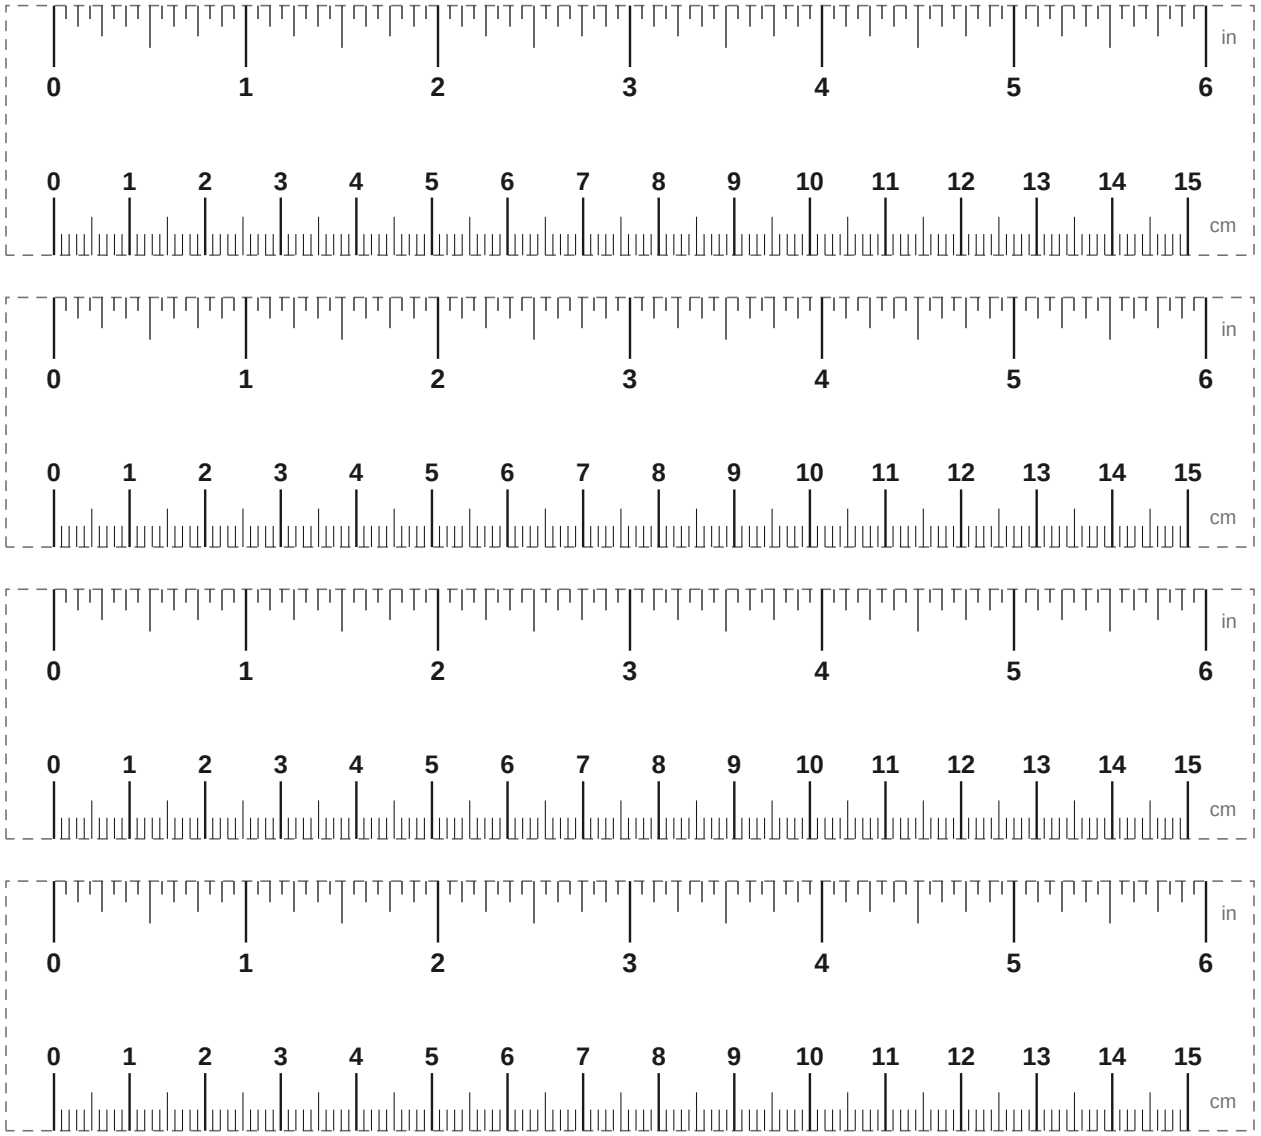

85.6 x 54 mm (3.37 x 2.13 in)

If the card or the lines do not match, the printer scaled the page.
Reprint with Actual size or 100% selected, and Fit to page turned off.
1 in = 2.54 cm exactly. 10 in = 25.4 cm.

Cut-out rulers: 6 in on one edge, 15 cm on the other. Cut along the dashed lines.

Glue a strip to thin card stock before cutting if you want it stiffer. Check it against the scale outline on page 1.
